The best
technique
for fat
reduction!

BellyAttack®

Losing weight fast

with **WFIR!**

The BellyAttack® applies patented WFIR (Wireless Far InfraRed) technology to your body. Especially in combination with (fitness)training WFIR is considered the ultimate fat burning method.

Research showed that Far Infrared radiation applied to the human body has beneficial effects such as stiffness reduction and toxins removal. It may even contribute to a rejuvenating night's sleep!

Exercising while using Far Infrared technique is becoming increasingly popular, however it has been very restraining since the equipment needed to be plugged into a power outlet.

With the wireless BellyAttack® cables are not needed anymore, giving you full mobility. This allows for maximum fat burning during your favourite fitness training, group exercises or while jogging.

The inner layer of the product is a tourmaline covered carbon heat fabric that continuously radiates Far Infrared heat with a comfortable temperature and pressure. It dilates the blood vessels which effectively improves blood circulation, relieves muscle fatigue, activates cell metabolism, relieves pain caused by a cold and enhances resistance to diseases. The results are amazing! Within 4 weeks you may reduce your waist by 1 to 2 sizes.

Fat burning program

During a 4 week period you will be using the BellyAttack® 3 times a week for at least 45 minutes. The program starts with an initial test and will be concluded with a final test. Of course you will get clear instructions on how to use the BellyAttack®.

For best results combine your favourite exercises or group class with using the BellyAttack®. There is no need to changing your diet. After 4 weeks the final measurement will show the reduction of your body fat percentage and how many inches you have permanently lost.

You will be stunned by the results and also feel better since your physical fitness will be significantly improved.
